MISSION TIME TRAVELERS!

**Subject:**

History, Arts & Design, Digital Competence

Content:

Travel to Key Historical Eras

**Preparation time:**

30 min

**Age:**

8-12 years

**Duration:**

180min - 270min

**Location:**

Classroom

**Group distribution:**

Pairs or trios

**Difficulty****Computational practices:
choose what fits**

- **Decomposing**
- Pattern recognition
- Abstraction
- **Algorithms**
- **Problem solving**

Unplugged/**plugged:**

Creative coding & storytelling

After this lesson, the children will be able to...

- Explain the importance of historical moments across Europe.
- Work with basic programming concepts in Scratch: sequences, events, conditionals, loops, and variables.
- Collaborate to create a digital product.
- Develop creative thinking, problem-solving, and digital storytelling skills.
- Appreciate the diversity and common roots of European history.

Materials needed:

- 1 laptop/tablet with camera for every group of 2 children
- 1 blank template for every group of 2 children
- 4 inspiration sheets for every group of 2 children
- 1 Time Trabel Notebook printed per group
- Programming Plan printed per student
- Pencil and rubber

Helpful links:

- Sound editor tips: <https://youtu.be/f9XdHoOBJY8>

Preparation and teacher notes

Read the **Teacher's Guide**

Session 1- LAUNCH THE MISSION & PLAN THE STORY (90')

Warm-up (20 min)

Activity: Read the "Time Agent" story aloud or play a dramatic recording.

Let students imagine they are in the year 3025 and history is disappearing.

Optional: Dim the lights or play music for a dramatic effect.

Goal: Motivate students and introduce the mission!

Sketch phase (35 min)

Activity: Students form teams and pick 2 or 3 time periods/events from across Europe (e.g. Ancient Greece, Vikings, Berlin Wall...).

- They fill in the Time Travel Notebook, writing down:
 - What happened in that time
 - What the "glitch" is
 - How they will fix it (game, puzzle, animation)
- Draw simple ideas for scenes or characters.
- **Goal:** Plan the historical story and creative content.

Build-up (35 min)

Activity:

- Teams sketch out their Scratch project structure:
 - Scene 1 = Time Lab
 - Scene 2 = First historical stop
 - Scene 3 = Second historical stop
- Choose:
 - Who speaks?
 - What happens?
 - What interactive part will they code?
 - **Goal:** Prepare a clear plan for their digital time mission.

Preparation and teacher notes

Read the **Teacher's Guide**

Session 2- CREATE THE INTERACTIVE STORY IN SCRATCH 90'

Warm-up (10 min)

Activity:

- Short Scratch demo by teacher (or video):
- How to use backdrops, sprites, events, and broadcast blocks.
- Show a sample mini project, if possible.

Goal: Refresh or learn basic Scratch coding blocks.

Sketch phase (10 min)

Activity:

- Teams review their Time Travel Notebook
- Finalize choices: scenes, characters, how the glitch appears

Goal: Get ready to build the project.

Build-up (70 min)

Activity: Students create their Scratch project:

- Program scene changes (e.g., "when space key pressed → switch backdrop")
- Add characters, dialogues, sounds, or speech bubbles
- Include one interactive element in each time scene (e.g., quiz, puzzle, click object)
- Use loops, conditionals, broadcasts where possible
- Teacher helps with code blocks or bugs as needed.

Goal: Complete most of the Scratch story/game.

Preparation and teacher notes

Read the **Teacher's Guide**

Session 3: FINAL TOUCHES, PRESENTATIONS & CELEBRATION

Warm-up (10 min)

Activity: Quick game or quiz:

"Which country had this event?" "Who made this invention?"

OR play one group's project as a sample.

Goal: Review history and get excited to share.

Sketch phase (20 min)

Activity:

- Teams add final touches to the Scratch project:
 - Sounds, transitions, intro or score system
 - Check spelling, code, and scene flow
- Decorate their Time Travel Notebook cover

Goal: Make the final product fun and complete.

Build-up (60 min)

Activity:

- Present the projects to the class (5–6 min per team)
- Give and receive Time Agent Badges
 - Peers or teachers choose: Best History, Creative Design, Smooth Coding, etc.
- Take group photo or give certificates

Goal: Celebrate learning, reflect, and build pride in teamwork.

TIME TRAVEL NOTEBOOK

Team Name: _____

Agent Names: _____

Mission Date: _____

Mission Brief

You are Time Agents from the year 3025. Time is broken! Key moments in European history are missing. Your team must travel through time, find out what happened, and fix the timeline!

You will visit 2 to 3 historical periods or events. In each one:

Describe the event or place

Identify the time glitch

Decide how you will fix it using storytelling and Scratch programming

HISTORICAL DESTINATION #1

Name of period/event: _____

Country/Region: _____

Date/Time period: _____

What was important about this time in history?

What is the glitch? (What has gone wrong?)

How will you fix it? (Puzzle, quiz, animation, interaction?)

Characters or objects to include:

HISTORICAL DESTINATION #2

Name of period/event:

Country/Region:

Date/Time period:

What was important about this time in history?

What is the glitch? (What has gone wrong?)

How will you fix it? (Puzzle, quiz, animation, interaction?)

Characters or objects to include:

HISTORICAL DESTINATION #3

Name of period/event:

Country/Region:

Date/Time period:

What was important about this time in history?

What is the glitch? (What has gone wrong?)

How will you fix it? (Puzzle, quiz, animation, interaction?)

Characters or objects to include:

Programming Plan

Scene 1 (Mission Briefing / Time Travel Lab):

What will happen? _____

Sounds?

Animation?

Scene Transitions: How will you move between time periods?
(e.g., buttons, keyboard, magic portal sprite?)

Bonus Ideas:

- ☒ Add background music?
- ☒ Use score counters or time challenges?
- ☒ Include fun dialogue or voice recordings?
- ☒ Add "hidden objects" or Easter eggs?

Programming Plan

 Notes & Sketches

(Draw your ideas or take extra notes here!)

TEACHER'S GUIDE

MISSION TIME TRAVELERS

This guide supports teachers implementing the "Mission Time Travelers" activity with a European scope. Students become Time Agents, identifying and repairing time glitches in major historical events across Europe using Scratch. The project promotes creativity, digital skills, collaboration, and cross-cultural historical awareness.

Recommended age: 9–12 years

Duration: 3 sessions x 90 min

Format: Group work (pairs or trios)

Platform: Scratch (<https://scratch.mit.edu>)

How to Start

Introduce the Time Travel Mission with a fun narrative.

Help teams choose 2–3 historical moments to explore from across Europe.

Provide or allow light research using kid-friendly history websites or materials.

Guide students through the Time Travel Notebook.

Suggested Historical Periods & Events (European Focus)

Era	Example Event	Country/Region	Idea for Glitch
Ancient Greece	First Olympic Games	Greece	The athletes have forgotten the rules!
Roman Empire	Hadrian's Wall	UK / Roman Britain	Romans forgot how to build roads & forts
Viking Age	Viking Settlements	Scandinavia, UK	The longships are missing sails!
Middle Ages	The Black Death	Western Europe	The healers forgot how to treat people
Renaissance	Leonardo da Vinci	Italy	His inventions have disappeared
Industrial Era	Steam Trains	UK, Belgium, Germany	No one remembers how steam engines work
20th Century	Fall of the Berlin Wall	Germany	The wall is rebuilding itself!
World War I	Trenches & letters	France, UK, Germany	Soldiers forgot how to send messages
EU Formation	Treaty of Maastricht	Netherlands	The treaty is blank!

Encourage students to choose moments they find exciting or unfamiliar. Each "glitch" should present a problem that the players (or characters) must solve in the Scratch story/game.

TEACHER'S GUIDE

MISSION TIME TRAVELERS

Differentiation Tips

- Let more confident coders add points, levels, or animations.
- Allow younger students to use simpler interactions (e.g., click to reveal).
- Provide printed historical summaries for support.

◆ Coding Suggestions

- Use backdrops to change scenes (time travel).
- Use sprites to create characters or historical objects.
- Use "broadcast" and "when I receive" to control flow.
- Try "if/then" blocks for quizzes or choices.
- Add sound recordings for storytelling.

Optional Enhancements

- Hold a virtual exhibition with another European school.
- Print Time Agent Certificates at the end.
- Include a "mystery glitch" from another country for peer teams to solve.

Learning Outcomes

By the end of the activity, students will:

- Describe key historical events from different European countries
- Apply basic programming structures in Scratch
- Collaborate in teams to design digital content
- Express creativity through storytelling, visuals, and code

Quick Resources

- Scratch Tutorials
- BBC Bitesize History (English)
- Ducksters European History (simple English)

Let your class explore, create, and share their unique journeys through Europe's past!

"The Glitch in Time"

To be read aloud or recorded by the teacher with dramatic flair!
(Dark, mysterious tone)

"The year is 3025. The world is at peace. Technology, knowledge, and history have brought humankind together like never before.
But something has gone terribly wrong..."

Dramatic pause

"A Time Glitch has appeared in the Great Timeline. Across Europe, important historical events are fading. The fall of the Berlin Wall... vanished. The inventions of Leonardo da Vinci... erased. Ancient Greek democracy... deleted!"

"If we don't act fast, centuries of learning, culture, and progress will be lost forever."

(Tone shifts to inspiring)

"That's why we've summoned you – elite recruits from the European Time Agency. You are not ordinary students... You are now Time Agents."

"Your mission: Travel to the past. Uncover what went wrong. Fix the glitch. Restore history."

"You will work in teams. Each of you will visit 2 or 3 time periods. In each, you will meet historical figures, solve puzzles, and fix what was broken."

"To complete your mission, you must use your greatest tools:

Curiosity

Creativity

Collaboration

And your secret weapon: Scratch programming."

"Remember: The timeline depends on you."

(Idea: Triumphant music tone)

"Good luck, Agents. Europe's past – and future – are in your hands."

Optional Add-ons for Teachers:

Play dramatic music in the background (search "epic mission music" on YouTube)

Turn off lights or use visuals for suspense

Give each team a "Time Agent File" or badge to start

Let the mission begin!
