STORYTELLING WITH SCRATCH

**Subject:**

Foreign Languages (English)

Content:

vocabulary, including characters, actions, places, time words and emotions

**Computational practices:
choose what fits**

- Algorithms
- Problem solving

Unplugged/plugged:
plugged

**Preparation time:**

approx. 30 min

**Age:**

11-12 years old

**Duration:**

2 hours

**Location:**

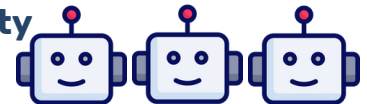

school, ICT classroom

**Group distribution:**

pairs of students

**Difficulty**

3/3

**After this lesson, the children will be able to...**

- use English vocabulary and structures related to characters, actions, and settings to write and narrate a digital fairy tale.
- apply storytelling techniques using time expressions, narration, and dialogue in English.
- collaborate in pairs to plan, script, and create an animated story using a Scratch template.
- self-assess their work using a checklist for story elements

Materials needed:

- One computer per pair of students with internet access
- Teacher's computer and projector, connected to speakers to play narration and sound effects
- Headphones with microphones for each pair of students to record narration
- Teacher's example storytelling project -The story of the lazy fox and the chick ([link](#))
- Student Template Project ([link](#))
- Worksheet 1: Vocabulary Bank Worksheet (see Annex)
- Worksheet 2: Storyboard (see Annex)
- Worksheet 3: Story elements checklist (see Annex)

Preparation and teacher notes

💡 Tips:

- Test internet connection and projector setup.
- Print one copy of each worksheet per pair.
- Prepare a visual timer for pacing activities.
- Ensure all students are logged into Scratch or have access to class accounts.

Warm up 10'

To activate students' prior knowledge and build excitement for storytelling.

Steps:

1. Greet students and briefly explain: "Today we'll create our own fairy tale using Scratch!"
2. Show the example project (The Lazy Fox and the Chick) using projector and sound.
3. Ask guided questions:
 - "What happens in the story?"
 - "Who are the characters?"
 - "What places do you see?"
 - "What did you hear?"
4. Introduce the goal: Students will remix a Scratch project and create their own narrated fairy tale!

Build up 60'

Here you should guide students in developing their story ideas and starting their Scratch remix project.

Steps:

Vocabulary & Planning (30 min)

1. Distribute Worksheet 1: Vocabulary Bank.
 - Students brainstorm and select characters, actions, places, emotions.
 - Encourage them to add new words or use translations.
2. Distribute Worksheet 2: Storyboard.
 - Students plan the beginning, middle, and end of their story.
 - Prompt them to include dialogue and narration.

Preparation and teacher notes

💡 Tips:

- Monitor pairs, help with vocabulary, grammar, and Scratch blocks.
- Help them divide tasks (one student animates, one writes/records).

Template Exploration & Remixing (30 min)

1. Open the Student Template Project on all computers.
2. Guide students:
 - Change backgrounds (at least 4 including title screen).
 - Add or modify 3 characters.
 - Start writing short narration lines using sequencing words (First, Then, Suddenly...).
 - Add dialogue using speech bubbles or audio.
 - Insert motion blocks to animate the story.

Rehearsal 40'

Here you should help your students in programming, recording and rehearsing the digital story, integrating all story elements.

Support students as they:

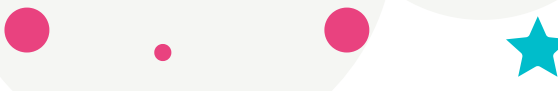

- Record narration using Scratch's microphone or text-to-speech feature.
- Add sound effects from Scratch's sound library or record their own.
- Test and revise story flow: backgrounds, timing, character movement, and audio.

Distribute Worksheet 3: Story Elements Checklist.

Students review their story and check if they have:

- 4 backgrounds
- 3 characters
- Narration
- Dialogue
- Sound effects
- Character motion
- Beginning, middle, and end

Allow students to make final improvements.

Preparation and teacher notes

-

Clean up 20'

Ask pairs to present their projects using the projector and speakers. Encourage the audience to listen carefully and give positive feedback.

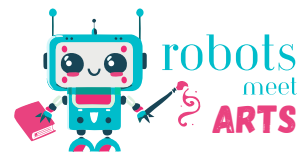

Annex: Worksheet 1 - Vocabulary Bank Worksheet

Use this worksheet to collect useful words for your story. You can also add your own translations or extra words you want to use. Circle the words you want to use and write your own words in the empty rows.

characters	actions	places	time words	emotions
wizard	run	forest	Once upon a time	curious
Knight	jump	school	Later	nervous
animal	discover	castle	After that	lonely
troll	escape	secret garden	Just before midnight	excited
creature	disappear	magical village	In the end	angry

Annex: Worksheet 3 - Story elements checklist

Use this checklist to make sure your Scratch story includes everything needed.
Check each box as you complete the task.

1. Characters

- ☐ I included at least 3 different characters.
- ☐ My characters speak using dialogue (speech bubbles or recorded voice).
- ☐ My characters move in the story (walk, glide, fly, etc.).

2. Backgrounds (Settings)

- ☐ I used at least 4 different backgrounds.
- ☐ One background shows the title of my story.
- ☐ Each background matches the part of the story (beginning, middle, end).

3. Narration

- ☐ I added narration using voice or Scratch text-to-speech.
- ☐ My narration uses sequencing words (First, Then, Suddenly, In the end).

4. Dialogue

- ☐ Characters talk to each other using speech bubbles or voice.
- ☐ I used at least 3 different dialogue exchanges.
- ☐ The dialogue helps tell the story or show feelings.

5. Sound Effects

- ☐ I added at least one sound effect (e.g., music, laugh).
- ☐ My sounds match the actions in the story.

6. Movement & Animation

- ☐ I used motion blocks (e.g., glide, move, turn) to animate characters.
- ☐ Characters move between scenes or interact with objects.

7. Story Structure

- ☐ My story has a clear beginning, middle, and end.
- ☐ There is a problem and a solution in my story.
- ☐ The story ends in a way that makes sense.
