CAR RACE

**Subject:**

English

Content:

Comparative, superlative form, car description & features

**Computational practices:
choose what fits**

- Algorithms
- Problem solving

Unplugged/plugged: plugged

**Preparation time:**

30 min

**Age:**

9-11 years

**Duration:**

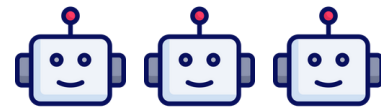

120 min

**Location:**

on-site

**Group distribution:**

3-4 students per group

**Difficulty****After this lesson, the children will be able to...**

- collaborate in teams to design, build, and test a LEGO SPIKE Essential race car, improving its speed, stability, and efficiency through iteration.
- use basic programming skills in the SPIKE app to control the car's movement and refine its performance for a classroom race.
- use English vocabulary and structures to describe the features of a car.
- apply comparative and superlative forms (e.g., faster, stronger, the best) to compare cars.

Materials needed:

LEGO SPIKE Essential Sets

- 1 SPIKE Essential kit per group (3-4 students)
- Devices with the SPIKE app installed (1 per group)
- Charging cables or power banks (just in case)
- Lego instructions on how to build a vehicle ([link](#))

Race Area

- A clear track or race lane on the floor
- timer (to be projected on screen, if possible)
- Tape to mark the start and finish lines on the floor

Mini trophies, medals, or stickers for the fastest car, best design, most socially impactful and best presentation.

Annex

- Worksheet 1 - Car Pictures
- Worksheet 2 - Race Car Presentation
- Worksheet 3 - Reflection on car features using comparative & superlative forms

Helpful links:

[LEGO Spike Essential - instructions on building a car](#)

Preparation and teacher notes

- Test LEGO SPIKE app and Bluetooth connections on all devices before the lesson begins.
- Print one copy of each worksheet per team.
- Use a visual timer to help pace building, testing, and presentation activities.
- Charge all LEGO hubs and tablets/laptops in advance to avoid disruptions.
- Set up a **race track area using tape** for the testing phase and the final race.
- Prepare and display vocabulary prompts (adjectives, phrases) on the board or screen for easy reference during speaking tasks.

Warm up 10'

Show images of cars (see Annex- Worksheet 1). Ask students:

- What do you see?
- What makes a car fast or cool?
- What do these cars do to help the world?

Explain the mission of this lesson: "You will build a car, test it, improve it, and then make it compete in a race it! Your car will not only be fast – it will also do something GOOD for the world!"

Build up & Test 50'

Part A: Build the Car (30 min)

In groups, students build their LEGO SPIKE race car. Ask students to follow the instructions on the Lego website ([link](#)) and then ask them to experiment and modify the model based on their preference.

Part B: Program & Test (10 min)

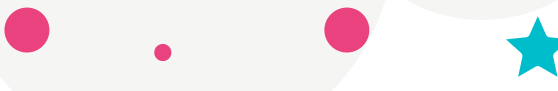

Students use the SPIKE app to program basic movement (e.g., forward motion). Students perform 1–2 test races (on the race area) to check speed and direction.

Part C: Improve the Car (10 min)

Let students make improvements based on test results.

Rehearsal 30'

Students prepare and present their cars. To do that, they read in groups Worksheet 2 and complete exercise 2 with the name, color, features, abilities, slogan of their car. They are encouraged to add the social impact that their car will bring e.g., it helps clean the air or it brings food to faraway villages.

Preparation and teacher notes

Race, Reflection & Clean-up 30'

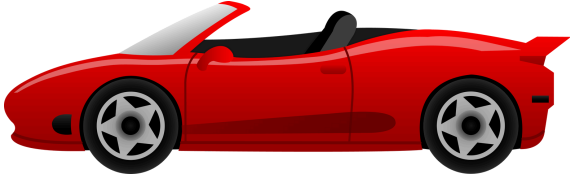

PART A (presentation & race)

- First of all, groups present their car (based on Worksheet 2, exercise 2)
- Then, all cars run the final race on the race track designed on the floor.

PART B (reflection & comparisons)

- Students vote for the fastest car, best design, most helpful car, best presentation.
 - Students compare their cars using comparative & superlative language (see worksheet 3). Each student write 2–3 sentences (see worksheet 3).
 - After that, students read their sentences aloud in groups.
- 

It has a solar-powered engine and quiet wheels. It teaches people about green technology.

Race Car (Ferrari)

It is very fast car. It has a strong engine, special tires, and a light body so it can go super fast.

Speed Shark

it goes on land and water and delivers clean water to villages during floods

EcoZoom

It has a solar-powered engine and quiet wheels. It teaches people about green technology.

Annex: Worksheet 2 - Race Car Presentation

Exercise 1. Plan your race car presentation

Use this sheet to plan your race car's presentation. You can use the following words and phrases.

fast

strong

cool

electric

colourful

shiny

powerful

- It has...
- It is...
- It can...
- Buy it now!
- This is the best car ever!
- Only for real racers!
- Are you ready to race?
- Don't miss it!

Car Name	What is the name of your race car? Give it a fun, catchy name
Color(s)	What colors is your car? Does the color match its speed or personality?
Special Features	What cool parts or unique things does it have? For example: wings, lights, etc.
What can it do?	What makes your car special? Is it fast? Can it jump, fly, or go on water?
Why do you like it?	Tell us why you are proud of this car.
Slogan	Write a short, exciting phrase to make people want to buy it! E.g., 'Speed like lightning!'

Exercise 2. Write your race car presentation

Use the space below to write the car presentation or write notes.

Annex: Worksheet 3 - Reflection on car features using comparative & superlative forms

Comparative & Superlative forms - examples

The **race car** is faster **than** **EcoZoom**.

VS

Speed Shark is bigger **than** the **race car**.

VS

EcoZoom is **the most** environmentally friendly car in the race.

Reflect on your car and other teams' cars. Compare their features using comparative and superlative forms. Use the space below to write 2-3 sentences. You may use the following adjectives: fast, slow, loud, clean, powerful, creative, helpful, environmentally friendly, interesting, etc.
